Project 13-1347 H1

## PROJECT UPDATE

### Watermain Replacement and Improvement South Sheridan Way and Indian Grove

The Region of Peel was working in your neighbourhood last year to replace the watermain along South Sheridan Way and Indian Grove. This work was required to maintain and improve existing water services.

At this time, we have:

- Replaced the watermain on a short section of South Sheridan Way and on Indian Grove,
- Connected properties to the new watermain by replacing individual water services and valve boxes, and
- Temporarily repaired the driveways, road, curbs, sidewalk and sod (grass) where disturbed by the watermain replacement and associated work.

#### Schedule for remaining restoration work

Construction was paused due to freezing temperatures. We expect to start work again the week of April 4, 2022 to complete the following:

- Repair of curbs, sidewalk, road, driveways, and sod (grass) where disturbed by the watermain and water service replacement and associated work.
- Subdrain (underground drain) installation and curb and sidewalk restoration will begin the week of April 4, 2022, starting south of the Tim Hortons and continuing down the south/west side of the road.
- Subdrain will be installed down the entire length of the street on the south/west side of the road, followed by curb then sidewalk, before moving to the north/east side of the road.
- Paving, driveway restoration, and sodding will follow once all curb and sidewalk has been installed.
- As work depends on weather, these dates may change.

We plan to complete this work by the end of June 2022. This work will be under warranty for two years from the completion date.

#### Contractor and working hours

The work will be completed by Rymall Construction and supported by GM BluePlan Engineering, both under contract to the Region of Peel. This contractor's normal working hours are from 7 a.m. to 7 p.m., Monday to Friday. These hours are consistent with the local municipality's bylaws. We understand this may cause some inconvenience, but shorter working days would require your neighbourhood to be under construction for a longer period of time.

#### Driveway access

It may be necessary to block your driveway for a short time when crews are installing subdrain. During curb and sidewalk restoration, **you will not have vehicle access to your driveway for 2-3 days** when the curb and/or sidewalk are being poured and the concrete is curing. Please park your vehicle on the opposite side of the street from the work during this time. The contractor will coordinate with affected residents 24-48 hours before the work. Please contact us if you have special needs related to access.

#### Sign up for email notices

Receive timely project updates right to your inbox by signing up for e-notices at [peelregion.ca/construction](https://peelregion.ca/construction).

### Traffic and parking

We may need to temporarily close roads or reduce traffic to a single lane during construction. On-street parking will be affected during construction when we are actively working on your street.

### Interrupting your water supply

It is our goal to let you know 48 hours (2 days) in advance if we plan to shut off your water for an **extended period** (several hours). Occasionally we may have to reduce this notice to 24 hours.

If we need to shut off your water for a **short duration** (less than one hour), we will knock on your door to notify you.

If we must shut off your water due to an emergency, we will knock on your door to alert you, and do everything we can to fix the problem as quickly as possible.

### Repairing grassy areas

The contractor will replace any damaged sod (grass) on the boulevard or your front lawn and will take care of the new sod for 30 days. You can help the sod stay healthy by watering it. A longer 'deep root watering' works better to establish new sod than watering more frequently for a shorter time. Watering in the early morning allows more water to soak in instead of evaporating.

### Repairing driveways

- **Asphalt driveways:** If we need to cut a section of your driveway, the driveway will be repaired by paving a stripe over the disturbed area, resulting in minimal seams in the final driveway. **The Region of Peel cannot replace your entire driveway.**  
If you would like to have the rest of your driveway paved, please contact the contractor, Rymall Construction, 416-745-0707. The contractor will then share contact information for the company hired to do the paving repairs. **Please remember this is your option. If you decide to have your entire driveway repaved, this extra paving work is your responsibility and outside the jurisdiction of the Region of Peel.**
- **Interlock or concrete driveways:** If we damaged a portion of your driveway, our contractor will reinstate the damaged portion of the driveway.

### Waste collection

Your garbage, recycling and organics containers will continue to be picked up on your regularly scheduled day. It is the contractor's responsibility to move your garbage, recycling, and organics bins from the end of your driveway to a location where waste collection vehicles can pick them up. Empty containers will be returned to their corresponding addresses. Please make sure your house number is clearly marked on each bin.

### Safety during construction

Construction zones require extra caution to keep everyone safe – pedestrians, cyclists, drivers, and construction workers. When driving, walking, or biking through the construction area, please be aware of your surroundings, watch for construction crews and other road users, slow down, account for delays, and consider other routes if possible. To learn more about how to stay safe in construction zones, visit

[peelregion.ca/construction/workzonesafety](http://peelregion.ca/construction/workzonesafety).

### Keeping you informed

We will let you know if there are any major changes to the plans.
